DETAILED ACTION

Priority

Page 2

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 12/05/2005 complies with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical

Art Unit: 2837

Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hayashi et al (5,793,171) or Schoeffler (5,627,710).

With respect to claims 1-7, Hayashi et al disclose a control circuit for controlling the driving of a DC motor for a mirror assembly of a vehicle comprising a motor 15, a temperature sensor 13, and a vehicle mirror actuation control (see figures 1-5). Hayashi et al disclose at the specification and the abstract that the PTC themistor detects the excess temperature/current to stop the mirror from at least folding in, and upon the temperature sensor sensing that the temperature of at least the portion of the control circuit has reached or exceeded the predetermined temperature threshold of the PTC thermistor, the vehicle mirror actuation control still allows the vehicle mirror to fold out. See the PCT/AU2004/000386.

With respect to claims 1-7, Schoeffler discloses an electric motor drive system for vehicle windows, sunroof, or mirror comprising a motor 10, a temperature sensor 23 and an actuation control (see figure 1). Schoeffler discloses at column 3 lines 23-64 that the temperature sensor 23 detects the temperature of the motor winding or at least a temperature occurring at the electric motor to switch-off the motor, for example in seat adjustment or mirror adjustments. See the PCT/AU2004/000386 search report.

5. Claims 1-7 are rejected under 35 U.S.C. 102(a)(e) as being clearly anticipated by Kurita et al (2003/0107340 or 6,838,850 with Foreign Application Priority Data JP 2001-156458 filed on 5/25/2001).

With respect to claims 1-7, the publication/patent to Kurita et al discloses method for controlling motorized storing door mirror comprising a motor M1, temperature sensors 15 and 18, and a vehicle mirror actuation control (see figures 1-4). Kurita et al disclose at paragraphs [0026], [0033] to [0037], and [0041] to [0046] the vehicle mirror actuation control prevents the vehicle mirror from at least folding in and allows the vehicle mirror to fold out as recited in the claims.

Allowable Subject

6. Currently none of the claims are allowable.

Communication Information

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Ip whose telephone number is (571)-272-1941.

The examiner can normally be reached on Monday to Friday from 6:30 am to 3:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lincoln Donovan, can be reached on(571)-272-1988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Internet correspondence **MUST** be provided with a prior written authorization by applicant in the application file record giving the Office authorization to communicate with applicant vie e-mail. Without a written authorization by applicant in place, the

Art Unit: 2837

USPTO will not respond via Internet e-mail to any Internet correspondence which contains information subject to the confidentially requirement as set forth in 35 U.S.C. 122.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
